## **Beginners Embroidery Club Applique Basics Supply List**

This month our basic technique is appliqué. Believe it or not there are designs already digitized with the appliqué placement stitching line included. We will learn how to work with these design types.

### **Supply List**

- Embroidery machine, cleaned, oiled, & ready to sew.
- Organ Titanium embroidery needles size 80/12
- Appliqué design\*
- Embroidery threads for design
- Bobbins wound with 40 wt. thread to match base fabric
- OESD Polymesh cut-away stabilizer
- Appliqué scissors (Gingher or Nifty Notions)
- Fabric for appliqué's-quilter's fat quarters or scraps
- Something to appliqué onto, i.e. t-shirt, baby blanket, or just solid color fabric.

\*Appliqué designs may be found in Embroidery Takeout, Dakota Collectibles, Anita Goodesign, and many of the different cards and collections in our stock. See the samples in the classroom.

We will be learning how to create appliqué templates for the pre-cutting of fabrics, to make the job easier and faster.

Design collections for appliqué will give you guidelines for how many fabrics you will need.

There will be a demonstration to help you learn how to create appliqué designs in your embroidery software.

If you have any questions, please feel free to give us a call.
